the original insulated transportable serveware

Large Insulated Serving Bowl

Whether you are sharing a white truffle parmesan risotto at an “impress my future in-laws” dinner party - or your black ‘n blue wings at a “must-win home-state rivalry” tailgate, you can be sure it will be served perfectly.

Made from food-grade stainless steel, our double-walled, copper-lined, vacuum-sealed Large Serving Bowls are designed to keep your food to temperature for 3-4 hours:

The highly-engineered lid is also double-walled and has a silicone seal to help with temperature control. By the way, that same silicone seal also keeps what's inside inside.

caviar

*Independent third-party testing showed hot food remained hot for 2-4 hours, depending on the density, starting temperature, and water content. Testing showed cold food remained cold for up to 4 hours!

Insulated Pitcher

Raise a glass to enjoying beverages that taste just the way you made them and not like some less-than, watered-down version.

Our insulated Pitchers are made from food-grade stainless steel. Better yet, they're double-walled, copper-lined, and vacuum-sealed to keep drinks hot or cold for 6-12 hours.*

Just keep the silicone-sealed lid on until you're ready to serve, and your carefully crafted mixology will stay perfectly to temp and safely inside.

*Independent third-party testing showed hot coffee stayed hot for 6 hours. Cold water stayed cold 12 hours, gaining only 2.4°, and only 5.6° over 24 hours.

Small Insulated Serving Bowl

Sides and dips enhance any meal. They may be served as support, but we all know a good guacamole or a sweet mango chutney will take the dining experience to a new level.

This bowl may be labeled small, but the benefits are unbelievably huge. Made from food-grade stainless steel, our double-walled, copper-lined, and vacuum-sealed Small Serving Bowls keep food to temperature for 2-4 hours. That's plenty of time to get to the party to receive the culinary adulation you deserve.

Last, and definitely not least, we've applied our amazing wizardry to the lids too. They are double-walled to help keep the temperature inside consistent and they have a unique silicone seal to keep your creations in the bowl, not your lap.
